

Global Coverage, One Partner.

Achieve your business outcomes with truly global solutions.

Remove the stress and complexity when it comes to your global Cisco estate. No matter the number, or the location, of your offices, Natilik can work with you as your global technology solutions partner.

How is **global coverage** possible?

It is made possible through Cisco's **Global Partner Network (GPN) program**, which enables Natilik to assist multi-national organisations with any and all global Cisco requirements.

The program means you only need to engage with a single partner like Natilik for your global requirements. Whether it's refreshing the collaboration end-points across your regional offices or rolling out DUO licences for your entire global workforce, Natilik can deliver a **globally coordinated solution**.

What are the **benefits**?

1. Cut costs

Reduce overall costs of procuring Cisco solutions with consistent discounts across all your locations.

2. Fewer suppliers

Consolidate suppliers so you have just one point of contact for your global teams.

3. Simplicity

Reduce complexity and free up time for your teams to focus on more impactful projects that will drive the business forward.

4. Consistency

Work with Natilik as your preferred partner in any country and ensure a uniform approach to the execution of your digital strategy.

5. Added value

Strengthen your global IT budgets and standards by leveraging your global Cisco spend and procuring through a single channel.

Capabilities in Action

Find out how Servcorp, a multi-national organisation providing offices, virtual offices and coworking solutions around the world, benefitted from Natilik's ability to deliver Cisco solutions on a global scale.
