Discover how Natilik and Gamma transformed the in and outbound SIP telephony of one of the nations leading building

This client came to Natilik looking for a complete overhaul of their legacy ISDN and PSTN solution. The client was currently utilising many ISDN channels across two data centres, resulting in various PSTN connections across its 80 locations. This left the client vulnerable to single points of failure, had a high cost and limited the ability to flex capacity as and when demand dictated.
