NATILIK

Possible Together
Why Natilik for your Juniper Networks

Together, Natilik and Juniper Networks have confidently guided clients across multiple industries to deliver reliable cloud-managed network solutions that are AI Native.

As a Juniper Select partner, Natilik understands the ins and outs of Juniper's networking solutions and capabilities, from its microservices architecture to its Bluetooth beaconing. Having transformed client networks from difficult to manage into cutting-edge, easy-to-run, Natilik and Juniper have a strong and proven partnership.

Top three reasons to work with Natilik and Juniper Networks

1.	2.	3.
Best-in-class solutions	**Market-leading expertise**	**Proven success**
Natilik is known for its networking expertise, scoring an outstanding NPS of 61 from our networking clients. Furthermore, Juniper is a 3x leader in the 2022 Gartner® Magic Quadrant™ for Wired and Wireless LAN Infrastructure.	With over 20 years of wired and wireless networking experience, the Natilik team excels in defining, designing, deploying, monitoring and optimising modern networking solutions, always seeking out cutting-edge developments.	Together, Natilik and Juniper have designed and deployed numerous, often complex, network solutions for organisations globally across verticals such as finance, legal and professional services and more.

What's in it for you?

Assured User Experiences
User experience is now considered the most important metric for measuring network performance. With Juniper's AI-native enterprise and native AIOps you have the proactive controls to assure your users' experience and support their productivity.

Reduced Troubleshooting
Juniper Mist AIOps gives your IT team deep visibility and insights to quickly resolve issues. The Marvis Virtual Network Assistant also proactively turns data into action with automated, self-driving responses to issues in the making.

Modern Microservices Cloud
Juniper solutions are architected in a modern microservices cloud, meaning you can automate deployment and operations, deliver new features, bug fixes, and exploit patches without downtime and scale your network on-demand in the cloud.

Central Control with AI Built-in
Being centrally operated with a controllerless, modern cloud, Juniper's AI Native platform is 100% API programmable and capable of near-real-time bug fixes and feature updates. All without network disruption.

What we can do together for your business

From initial design to finding the right level of support, the Natilik team has experts on hand every step of the way to ensure your solution meets your business outcomes. With our managed service offering we can also support your seamless day-to-day network operations as if we are one of the team.

Discovery workshops	**Wi-Fi surveys and assessments**	**Solution design**
Trials and proof of value	**Project management**	**Network migration assurance**
Recycling of old hardware	**24/7 tech support**	**Network as a service (NaaS)**

Partnering with us

Five key ways why partnering with Natilik is different

Capability	Coverage	Consistency	Culture	Clients
Experts you can trust	**Supporting your global teams**	**Dedicated to best practice**	**Aligning our values together**	**Your partner for success**
Our highly accredited global team holds a depth of knowledge to define, design and deploy best in class Juniper solutions with innovation at their core.	We support clients in over 100 countries worldwide. Operating out of our three centres of excellence in London, Sydney and New York.	Natilik utilises a unified set of systems, processes, governance, and methodology, driving consistent customer experiences globally.	Natilik prides itself on bringing together a group of passionate people united in a common purpose. Put simply, we believe that Natilik is big enough to matter, but small enough to care.	We hold strong partnerships with some of the world's most respected organisations. This is reflected in our consistently high NPS scores and client retention rates.

Ready to take your network new heights?

Start your journey to building an environment that enables your business to thrive with a **Modern Networks discovery workshop**. In the workshop, a Natilik technical expert will deep-dive into the key challenges you face and the outcomes you're looking to achieve. Following this, we'll make recommendations for the next steps to enable you to achieve your desired modern network.
