NATILIK

Natilik Assured Network Service
Start your journey to Cloud Network Management today

Managing modern networking infrastructure is becoming ever more complex as our users now hybrid work from any location and applications are accessed from any cloud. Assuring networking operations and user experience is more challenging than ever.

Natilik understands that managing modern networks is an increasingly complex task, requiring talented people and specialised management solutions across campus networking, Wi-Fi, security, WAN and beyond.

That's why Natilik's Hosted Catalyst Center service was created...

Powered by cutting-edge data centres spanning the US, UK, and Europe, the Natilik Platform offers an agile IaaS solution tailored to adapt alongside the dynamic nature of your business. Natilik has brought Cisco's market-leading network management solution Catalyst Center into the Natilik Platform which we can offer as a simple turn-key network operations solution.

Combine this alongside Natilik's award-winning managed service capability will help take the pain away from your BAU network operations and allow you and your team to focus on your key business initiatives, all without the headache and cost of maintaining your network management solution.

Simply choose your required level of service and leave the day-to-day management to the Natilik team.

Empowering your business with...

Simplify and reduce costs by moving away from on-premise management

Support your cloud-first strategy to include network management

Reduce business risk with enhanced management capability and availability

Get time back to focus on business-critical tasks

Reduce network downtime and time to resolution

Underpinned by the Natilik Platform

Providing a diverse range of services from data protection to customer engagement the Platform is trusted to deliver 200,000+ customer interactions and 75,000+ calls per day, as well as critical network operations and disaster recovery for market leading organisations.

1. Secure

Implementing a zero trust approach, the platform leverages service graphing and software defined networking to deliver micro segmentation, storage appliances delivering FIPS compliant encryption at rest and the latest privileged access management tools.

2. Available

Services provided by the Natilik Platform are architected to deliver a proven availability target of 99.99%, this is delivered via multiple geographically redundant facilities rated tier 3+ or higher by the Uptime Institute.

3. Connected

The Natilik Platform is on-net at 800+ Data Centres globally with points of presence throughout the UK, Europe and North America. The Platform peers with multiple Tier 1 and 2 ISPs located at key fibre hubs and internet exchanges around the world.

bsi. ISO/IEC 27001 Information Security Management

The Natilik platform is certified to the highest standards including ISO 27001 by the BSI / PCI-DSS.

Partnering with us

Five key ways why partnering with Natilik is different

Capability	Coverage	Consistency	Culture	Clients
Experts you can trust	**Supporting your global teams**	**Dedicated to best practice**	**Aligning our values together**	**Your partner for success**
Our experts hold a depth of knowledge that equips us to define, design and deploy the best back up architecture for your business.	We support clients in over 60 countries worldwide. Operating out of our three centres of excellence in London, Sydney and New York.	Natilik utilises a unified set of systems, processes, governance, and methodology, driving consistent customer experiences.	Natilik prides itself in bringing together passionate people. Put simply, we believe that Natilik is big enough to matter, but small enough to care.	We hold strong partnerships with some of the world's most respected organisations. This is reflected in high NPS scores and client retention rates.
