

You asked and they listened...

Introducing Cisco devices for Microsoft Teams Rooms

As work has evolved, it has become increasingly apparent that delivering seamless collaboration means that we need to be flexible. With 85% of individuals using more than one collaborative meeting platform a day, ensuring a connected and unified experience is crucial. So, in response to this, Cisco and Microsoft have partnered up to go beyond interoperability, providing you with the capabilities to natively run Microsoft Teams on the Cisco devices you know and love.

From the boardroom to the spare bedroom, you can now enjoy an elevated Microsoft teams room collaboration experience, powered by Cisco's intelligent devices.

Elevated Teams meetings powered by Cisco devices

Room Bar

Room Kit Pro

Board Pro 55/57

Available Q1 2023

Room Kit EQ

Desk Pro

Room navigator

Available mid-2023

Are you already a proud user of one of these devices? Keep your eyes peeled for the software update...

So, why Cisco devices for Microsoft teams?

A familiar experience

Experience the full value of Teams meetings on certified Cisco video endpoints.

The full capabilities of Webex meetings

Join feature-rich Webex meetings and access all of your third party apps even when you are running the device in native Microsoft Teams mode.

Intelligent camera views

Leverage optimised people framing and intelligent views to create more inclusive, true-to-life meetings where every attendee gets their time in focus.

No distractions

Block out unwanted background noises and enjoy crystal-clear sound and sophisticated audio controls.
