

# Natilik’s next-generation monitoring powered by LogicMonitor

Natilik’s Alert and Monitoring service is powered by LogicMonitor’s industry-leading SaaS-based automated platform.

It delivers a unifying observability solution capable of providing proactive and intelligent monitoring across a wide range of infrastructure assets and applications. Backed by Natilik’s experienced 24/7 tech support team keeping a close eye on your infrastructure, this service means you don’t need to worry about reactive firefighting or the drain of constant monitoring on your internal resources.

## How it can help you optimise your infrastructure

Explore five ways that monitoring from Natilik and LogicMonitor can keep your systems running like clockwork without the responsibility of day-to-day monitoring.

1.

### Reduce tool sprawl

this is great if your business has multiple point solutions and dashboards to navigate, for both on-premise and cloud-based, and is especially useful for acquisitive organisations.

2.

### Gain deeper visibility

by bringing your entire infrastructure together into one view, you will gain a better understanding of your environment with customisable dashboards showing you vital health metrics.

3.

### Improved MTTR

with the option of centralised log data, Natilik will help you pinpoint root causes more quickly - in addition, alert predictions can enable issues to be resolved before they become a problem.

4.

### Data-driven alerts

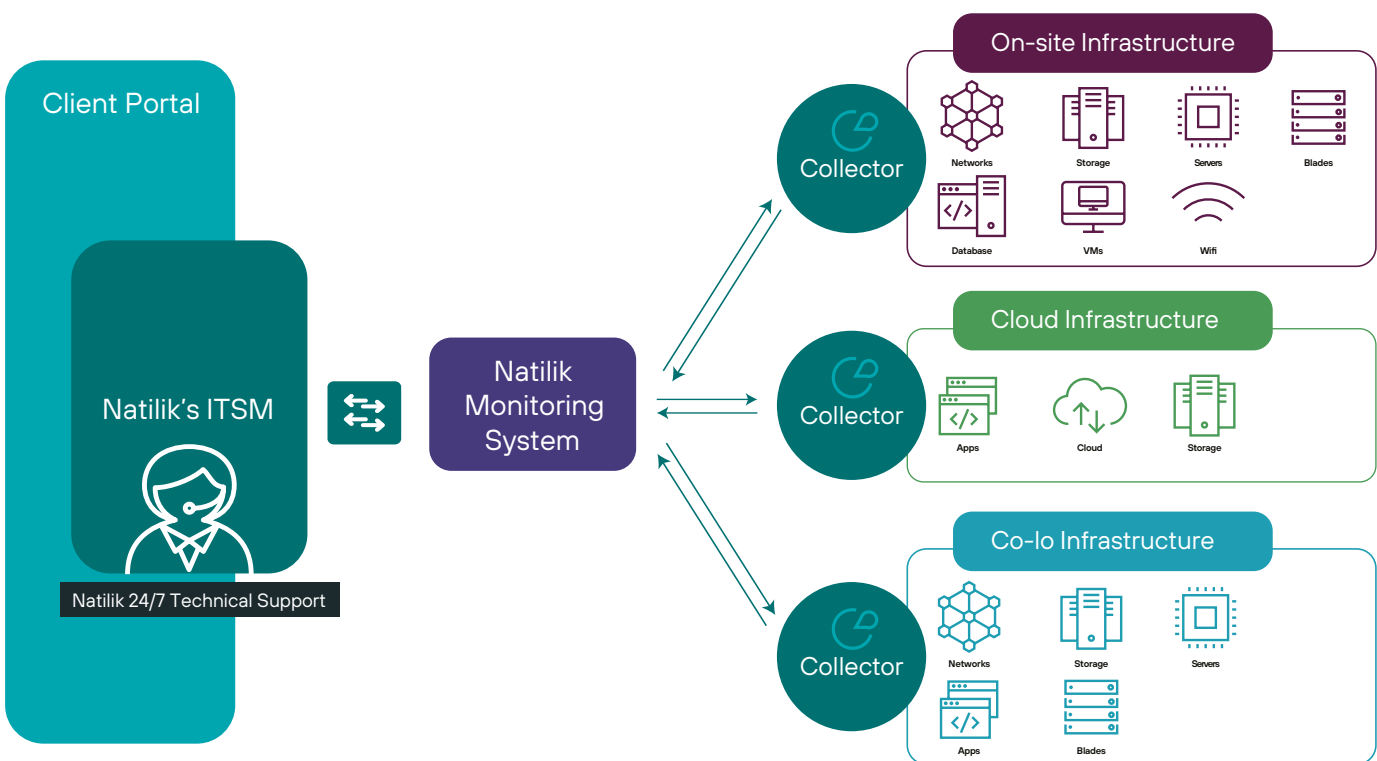

the intelligence of LogicMonitor means you can prevent alert storms and help you catch critical conditions without the noise or needless disruption.

5.

### Cloud billing control

helps you stay in budget by providing a view of how much your cloud subscriptions are costing your business so you can understand any areas of excess spend.

## Solution Overview

Natilik’s Alert and Monitoring service, powered by LogicMonitor, can be included as part of your managed service, or even extended across your in-house IT operations.

## It all starts with a demo

The best way to see how monitoring from Natilik will add more value and ROI from your infrastructure is to experience a demo with the Natilik experts. Get in touch to book yours today and take the first step in your journey to intelligent infrastructure optimisation.
