

# The Innovation Centre

Bringing the evolution of work to life...

# Welcome to The Innovation Centre

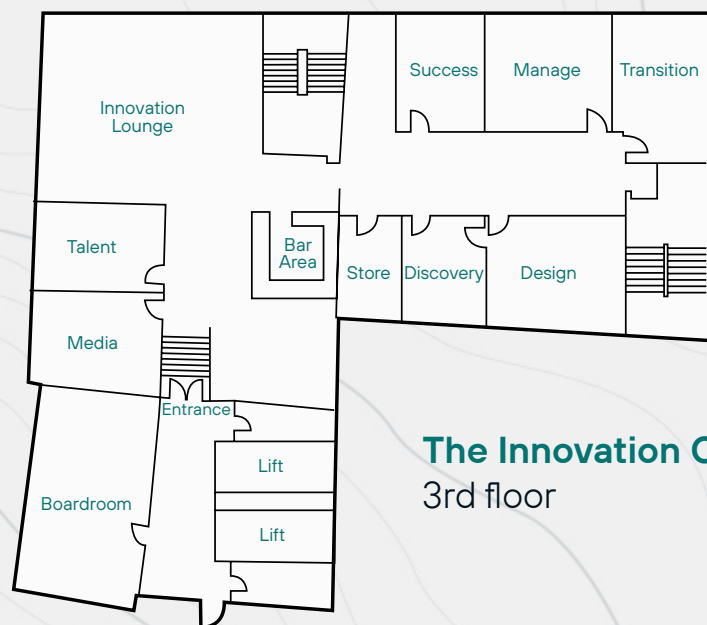

It's no secret that the way we all work is evolving. Where the 'workplace' was once defined as the physical corporate office, for many that now means the ability to work from anywhere, seamlessly. Be it from the office, from home, or on the go. Over the years organisations have seen technology evolve alongside those requirements, and attending the office has progressed past completing the day-to-day requirements of our roles. It is about showing up with purpose, with spaces that drive meaningful engagements and enrich experiences, whilst also ensuring a safe and inclusive work environment. With that, came a once in a generation opportunity for Natilik to create a space that is an embodiment of its culture...

## Possible together.

3rd Floor | 9A Devonshire Square | London | EC2M 4YN

## The new normal...

The Natilik team has tripled in the last 5 years and continues to grow. Traditionally, office and hot desking space would have grown at a similar rate. However, recent times and opportunities meant there was a decision to make. Rather than moving to a fully home-based working strategy, or bringing everyone back into the office full-time, feedback from internal people surveys and workshops was that Natilik needed to be flexible. And so, there was no longer a requirement for the third floor of its London office to be largely dedicated to physical desk space.

3rd floor

# Instead, it needed to evolve to be a space to...

Innovate

Go with purpose

Socialise

# Introducing... The Innovation Centre

Each zone within the Innovation Centre has been designed to ensure an exceptional experience for Natilik's people, clients, candidates, and partners. Where some are aligned to our proven services methodology, allowing clients to physically move through each stage of their solution lifecycle, others are focused on bringing everyone together in a safe and welcoming environment.

Innovation Lounge

**70**  
Capacity

Standing  
**100**  
Capacity

## Innovation Lounge

Featuring comfortable furniture, dynamic working spaces and an open plan bar area, the Innovation Lounge sets the tone for the exceptional experience that awaits Natilik's people, guests, and clients. With a simple close of a curtain, this zone can be split in two to create a private flexible hybrid event space, whilst also maintaining an exemplary visitor experience.

## Media

The Natilik experts are constantly looking for new and innovative ways to keep clients and the wider user community informed around the latest technology updates, industry regulations and insights from their peers. As such, the Media zone hosts a state-of-the-art content studio, with green screen video and podcast recording capabilities.

Media

## Talent

A welcoming and inclusive environment for anyone who progresses through the interview process with Natilik. From the library of thought-provoking reads, all the way through to the round table that seats candidates and hiring managers as equals, the Talent zone allows conversation to flow freely in a relaxed setting.

Talent

Design

## Discovery

Regardless of the size or complexity of their requirements, Natilik will always start the client's journey in the Discovery zone, bringing together their key stakeholders and the Natilik experts to understand their desired business outcomes and what they are hoping to achieve.

## Design

Having stepped through from Discovery into Design via an internally connecting door, here clients can experience a fully interactive, live demonstration or workshop of their desired solution. The high table was specifically chosen to create a more relaxed and informal environment, where interaction and conversation is actively encouraged.

## Transition

Combining the power of interactive collaborative technology, with a wall dedicated to the traditional whiteboard, this space is perfect to map out project timelines, create GANT charts and brainstorm objectives as the Natilik team guides clients into the transition phase of their project.

Transition

Manage

Success

## Manage

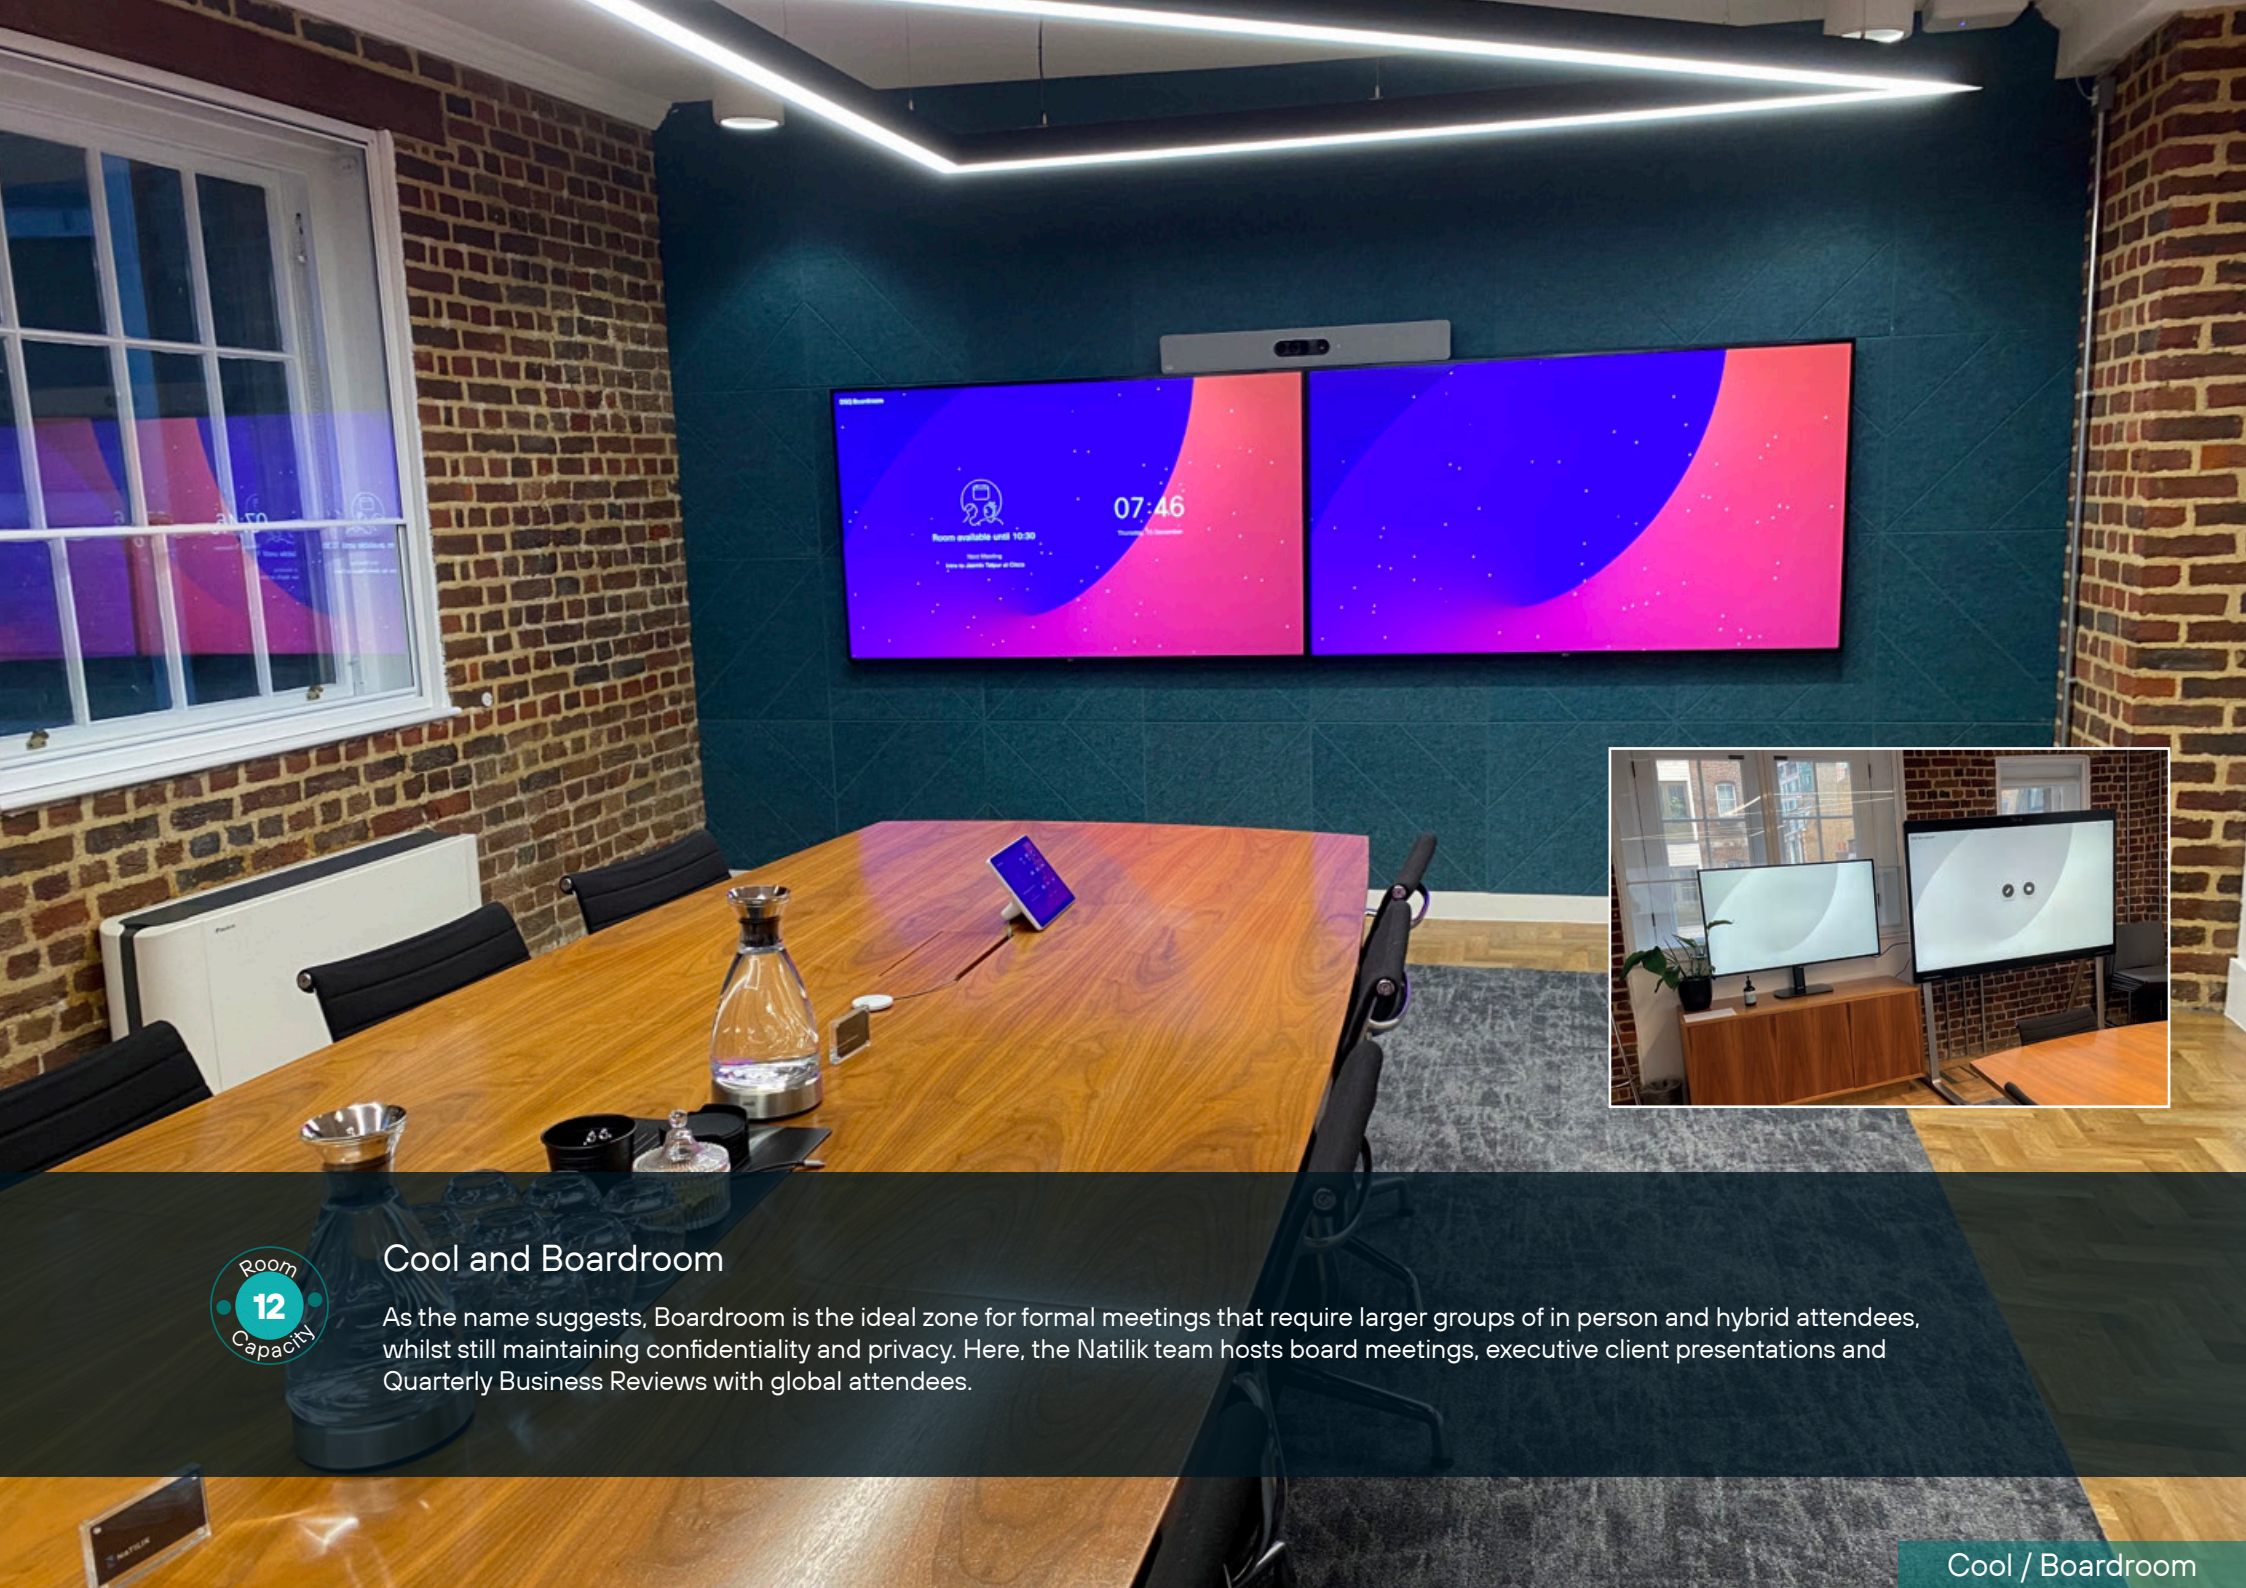

Taking inspiration from the tiered seating of a traditional auditorium, the Manage zone was designed to bring thought leadership, training, and enablement sessions to life in a multi-purpose environment. Here, the Natilik team works with clients to build a deep understanding of their goals and the services that will consistently deliver value to their businesses.

## Success

The Success zone is dedicated to ensuring Natilik's clients are not only using but loving their technology investments. Be it at the start of their journey when defining their key success criteria, or post deployment of a new solution to ensure that they are adopting and maximising their usage. This space is entirely flexible, with the ability switch from a relaxed conversation on the sofa, to a more formal discussion around a table depending on the nature of the meeting.

## Cool and Boardroom

As the name suggests, Boardroom is the ideal zone for formal meetings that require larger groups of in person and hybrid attendees, whilst still maintaining confidentiality and privacy. Here, the Natilik team hosts board meetings, executive client presentations and Quarterly Business Reviews with global attendees.

## Powered by...

The Innovation Centre is home to best-in-class collaboration technology and a strong infrastructure that enables the Natilik team to work with purpose. From world-class endpoints and collaborative devices, to a robust and agile network that securely connects them to the data, applications, and resources they need.

**Consistent meeting experiences across every platform, including WebEx, Microsoft Teams, Zoom and Google Meet**

**Bots and integrations**

**Room booking management**

**Digital signage**

**Interactive whiteboarding**

**Interactive maps and wayfinding**

**Background noise suppression**

**Real-time usage and environmental analytics**

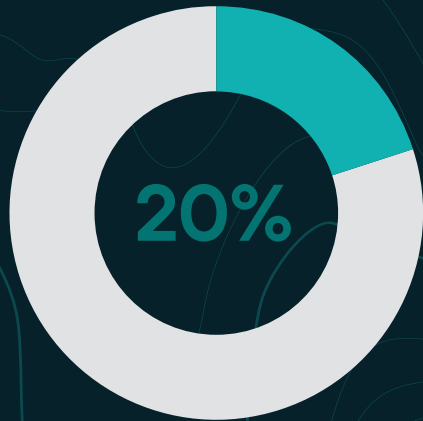

**Virtual assistant**

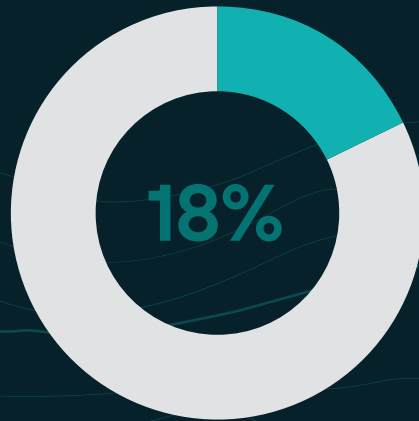

**ISO27001 security compliance**

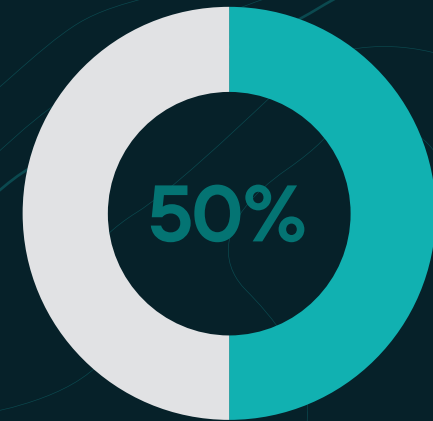

What has evolving the workplace helped Natilik to achieve?

decrease in real estate

increase in headcount

reduction in desks

increase in flexible  
meeting space

increase in meeting  
space usage

# Come and **experience** **the evolution** of work for yourself...

As you can see, the Natilik team understands the challenges organisations face when trying to ensure collaborative consistency as the workplace continues to evolve, having gone down this exact journey themselves. Scan the QR code below to arrange an 'Evolution of Work' immersive experience day and step through the technology and spaces that will:

**Enable your people to  
work with purpose**

**Protect your brand**

**Improve people  
retention**

**Recognise real cost  
savings**
