

Cisco devices for Microsoft Teams Rooms

As work has evolved, it has become increasingly apparent that delivering seamless collaboration means that we need to be flexible. With 85% of individuals using more than one collaborative meeting platform a day, ensuring a connected and unified experience is crucial. So, in response to this, Cisco and Microsoft have partnered up to go beyond interoperability, providing you with the capabilities to natively run Microsoft Teams on the Cisco devices you know and love.

From the boardroom to the spare bedroom, get the native Teams experience on certified room and desk devices from Cisco that bring augmented camera and audio intelligence, intuitive controls, and seamless device management to any workspace.

Elevated Teams meetings powered by powerful Cisco devices

Room Bar

Room Kit Pro

Board Pro 55/57

Room Kit EQ

Desk Pro

Room Kit EQX

So, why Cisco devices for Microsoft teams?

A familiar experience

Experience the full value of Teams meetings on certified Cisco video endpoints.

The full capabilities of Webex meetings

Join feature-rich Webex meetings and access all of your third party apps even when you are running the device in native Microsoft Teams mode.

Intelligent camera views

Leverage optimised people framing and intelligent views to create more inclusive, true-to-life meetings where every attendee gets their time in focus.

No distractions

Block out unwanted background noises and enjoy crystal-clear sound and sophisticated audio controls.

To see these innovations brought to life, click the button below to register for Smart and Sustainable Workplace Discovery Workshop in Natilik's state of the art Innovation Centre
