

# Modern Workplace Discovery Assessment

## Preparing your workspace for an upcoming move? Looking to streamline meeting room experiences for greater simplicity and consistency, but unsure where to begin?

The Natilik Modern Workplace Discovery Assessment is designed to support organisations like yours through periods of workplace evolution, enhancing both physical and digital environments. With your business outcomes at the forefront, the Natilik team will lead you through every step, ensuring your adaptative workspaces are secure, user-friendly, and optimised for maximum productivity.

### The Natilik team is here to help...

In today's dynamic work environment, organisations must adapt to hybrid work models that blend in-person and remote work. The Modern Workplace Discovery Assessment helps to identify gaps in your current workspace setup, uncovering opportunities for improvement, and ensuring that your collaboration tools are effectively supporting your business needs. With the guidance of the Natilik team, you can uncover ways to enhance employee productivity, improve user experiences, and future-proof your workspace against evolving technological demands.

### What are the benefits?

#### Enhanced collaboration

Identify opportunities to improve collaboration across various workspaces, from ad-hoc meeting zones to boardrooms, ensuring experiences are seamless and space management is simple.

#### Optimised workspaces

Evaluate the current design of your meeting spaces mapped to the Natilik teams best practices, ensuring you can create safe, secure, and supportive work environments that boost performance and manageability.

#### Improved user experience

Deliver engaging hybrid experiences that make in-person and online interactions seamless, enhancing your overall user satisfaction.

#### Increased security

Ensure that your hybrid work experiences are secure, protecting sensitive information and maintaining compliance with your industry standards.

#### Supported strategic planning

Build a roadmap for future improvements, helping you make informed decisions about workspace investments and upgrades.

### What will you take away?

#### Business analysis insights

Uncover a comprehensive overview of your current challenges and key business drivers which need to be addressed as part of your workspace updates.

#### User profiling results

Discuss your adaptive working strategy and identify your user's needs and their collaboration requirements.

#### An evaluation of your existing environment

Examine your current workspaces and footprints to assess their suitability for your users and

#### Guidance with environmental planning

Conduct a thorough examination of your current workspace setup, including an inventory of existing AV equipment and an assessment of audio properties, furniture layout, lighting, and space footprints\*

#### Suggestions for business change education

Educate on the art of the possible across your workspaces to support adaptive working.

### How can you put the insights into action?

Based on the findings, the Natilik team will then develop a high-level design that defines:

- Future workspace experiences
- Space footprints
- How you can leverage existing investments
- Improvements and remediation
- Breakdown of proposed costs and equipment needed

### Next steps...

- 1. Contact Natilik:** Contact us today to discuss your specific needs and schedule an initial consultation.
- 2. Assessment planning:** The Natilik team will work with you to plan the assessment, including setting dates and identifying key stakeholders. Dependencies will be identified prior to site visit. The Assessment is typically limited to a single full day on site and covers one physical location. Further locations can be included subject to agreement.
- 3. Conduct the assessment:** The Natilik team will then guide you through the assessment, gathering data and insights to inform the final report.
- 4. Review and implement:** The assessment findings and recommendations will be presented back to you, with guidance to help you understand how you can implement the proposed solutions.

\* Environment Planning is an optional component as part of the Modern Workplace Assessment and is chargeable and subject to an agreed scope of works.
