NATILIK

Natilik Multi-Cloud Practice

Finding the right balance for your business

Natilik empowers your business with a comprehensive multi-cloud proposition committed to enhance agility, operational efficiency and digital innovation.

In the ever-evolving digital landscape, we at Natilik perceive the industry as a dynamic ecosystem driven by multi-cloud technologies. Natilik confidently guide your business as you seek to harness the power of the cloud, navigating through all its complexities. With a move towards a more integrated and efficient operation of applications, a strong emphasis on agility and adaptability is key.

The journey through the cloud is becoming a critical aspect of business strategy, with a focus on navigating multi-cloud environments. As a result, choosing the right partner is becoming increasingly important. At Natilik, we position ourselves as your confident guide, committed to supporting your business through digital transformation.

Microsoft Azure

Landing Zone
Establish a solid foundation for your cloud journey with Natilik's Landing Zone, ensuring a consistent and secure setup across your business.

FinOps
Maximize your cloud value with Natilik's FinOps services, bringing financial transparency and cost optimisation to your cloud operations.
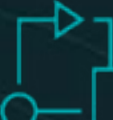

Azure Training
Empower your team with Natilik's Azure Training, enhancing your cloud skills and accelerating your digital transformation.

Kubernetes

Management
Providing scalable, policy-based full Kubernetes stack management with Spectro Cloud, enabling organisations to maintain control, flexibility, and operational efficiency.

Service Mesh and Networking
Consul and Isovalent - providing robust service mesh and networking solutions for seamless connectivity and enhanced security in your cloud-native environments.
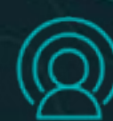

Storage
Portworx, a cloud-native storage platform provides scalable and persistent storage for your containers, enhancing data availability and security.

Cloud Operating Model

Delivering IaC
Accelerate your infrastructure deployment with Natilik's Infrastructure as Code solutions, leveraging the power of Terraform for efficient and reliable provisioning.

Delivering Self Service
Empower your teams with self-service solutions, utilising Consul and Terraform to streamline your cloud operations.

Agnostic Secret Management
Vault by HashiCorp provides secure, cloud-agnostic management of secrets across multi-cloud environments.
