NATILIK

Copilot Readiness Workshop

Powered by Crayon

Thinking about adopting Copilot within your business and unsure of where to start?

Whether you're struggling to understand the **technical and security requirements** or worried about **being left behind by AI** and want to look at the **possible use cases** within your organisation - the Natilik and Crayon teams are here to help with this exclusive workshop!

Harness the full power of AI

During a 90 minute interactive discussion, the Natilik and Crayon experts will provide you with a deep dive into the capabilities of Copilot, tailored specifically to enhance your operational efficiency and creativity within the Microsoft 365 suite.

Understand the technical prerequisites necessary measures for safeguarding information against inadvertent disclosure.

Develop strategies to leverage Copilot for improved customer engagement, data analysis, content creation and more!

Acquire hands-on knowledge of implementing Copilot's AI capabilities in everyday tasks using Microsoft 365 apps.

Equip yourself with the necessary knowledge to ensure seamless Copilot adoption within your business.

AI Adoption by Numbers

60% of organisations with reported AI adoption are using gen AI

Only **21%** of organisations have established policies governing employees' use of gen AI

Organisations will reskill more than **30%** of their workforces over the next three years as a result of AI adoption

How does the workshop, work?

Understand and explore

You will be introduced to AI and M365 Copilot, with a live demo of the tool and potential use cases. Here, the Natilik and Crayon teams will also identify the main opportunity areas for an efficient and targeted usage of M365 Copilot across your organisation.

Assess and prepare

Here we will work together to understand the requirements for implementing M365 Copilot within your organisation. Assessing your current readiness and giving clear definitive goals and expectations for the implementation of your top use cases.

You will then be provided a practical and actionable roadmap for discussing and implementing identified Copilot opportunities, as well as a clear understanding of the steps needed to deploy M365 Copilot in a way that makes the most of your continued investment.

The Right Partners for Your AI and Digital Transformation

Natilik is a technology services partner for businesses embarking on digital transformation across enhanced collaboration and modern work, customer engagement, cyber security, multi-cloud and data centre and modern networks for businesses globally. Partnering with Crayon, a global leader in software and cloud economics, digital transformation, and AI services.

As a combined team, we have extensive experience and expertise in helping organisations like yours to leverage the power of M365 and Copilot, while ensuring data quality, security, and compliance.
